* A second dose is needed 4 weeks after the first dose if receiving the influenza vaccine for the first time.

Children with certain medical conditions may need additional vaccines or additional doses of vaccines. Talk to your health care provider.

If your child missed a vaccine, you can make an appointment at your local health unit, community health centre, nursing station, or doctor's office for your child to get caught up.

There are other vaccines you can buy for your child for extra protection. Talk to your health care provider.
