

Your child's immunizations are due.

Immunizations can protect your child from life-threatening diseases like measles for the rest of their life. Immunizing your child helps protect people in your community who are too young to be immunized or who can't be immunized for medical reasons. Protect the herd!

Call to book your child's appointment today. To find a public health unit near you, visit ImmunizeBC.ca/finder

www.immunizebc.ca

Choosing to immunize protects us all.

An important reminder for all parents.
